Dear Customer:

Thank you for ordering Leroy's Cheatsheet keyboard overlays.

At Cheatsheet Products, we take the time to learn and use each program before designing a keyboard overlay. Not only are our overlays designed using easy to follow instructions and illustrations, but all commands are available and many extras are added to make programming easy and fun.

LEROY'S CHEATSHEETS are not intended to replace manuals. Study the commands first, then use the Cheatsheet. You will find that even the most complex program becomes easy to use. Program starting procedures are always located in the upper left hand corner, commands are logically grouped together in bold letters. The space within the cutout may contain additional charts, rulers, or mini-overlays. We suggest cutting the overlays on the **outside** edge of the dotted line.
